

Harbor Homes awarded grant

Published: Thursday, January 15, 2009

NASHUA – Harbor Homes Inc. was the recent recipient of a \$10,000 grant from the Madelaine G. von Weber Trust to support installation of a new heating and central cooling system at Harbor Homes' headquarters at 45 High St.

This grant follows support received from the Cogswell Benevolent Trust and the Samuel P. Hunt Foundation and brings the organization closer to installation of a new heating and cooling system. A new system will help lower energy costs resulting in increased funding for direct services to clients; increase energy-efficiency allowing a reduction in the carbon footprint of the building; and improve ventilation. The building serves more than 5,000 clients, health-care providers, case managers and others connected with Harbor Homes and its partner agencies.
